

A very very very long text with width 1.. and still writing.. and text wrapping by line breaking ... How long it will take... how long. Please tell me! Write this text so long that it will cross the horizontal boundaries. Let us see Still some text to write. A little longer words maybe ?. Almost done. I think now the text will finally stop rendering due to crossing parent layout bounding box boundaries!

This text will not cause words to break, instead text lines may break only when space or sign is present so that words are kept intact. And how long this text will be... how long? Please tell me!!! Write this text so long that it will cross the horizontal boundaries. Let us see Still some text to write. A little longer words maybe ?. Almost done. I think now the text will finally stop rendering due to crossing parent layout bounding box boundaries!
